VISPEC online

2 July 2021 | 14:30

VISPEC online is an e-meeting opportunity for researchers interested in vibrational spectroscopies and their manifold applications. VISPEC online is an ideal bridge between the latest VISPEC2019 conference held in Brescia and the next VISPEC conference to be held in Perugia. Through this initiative we wish to stimulate scientific discussions on vibrational spectroscopy, encourage collaborations, and welcome those interested to approach such spectroscopic techniques.

2 July 2021 | 14:30

Introduction

Hydrophobic hydration: water structure and dynamics as probed by Extended Depolarized Light Scattering (EDLS) and Raman spectroscopy

Marco Paolantoni (Università di Perugia)

Structural and dynamical properties probed by Ultrafast Infrared Spectroscopy

Andrea Lapini (Università di Parma)

Portable spectroscopy for qualitative and quantitative analysis of microplastics

Stefania Federici (Università di Brescia)

Conclusions

Registration: [Form](#)

The link to follow the Virtual Seminar will be sent by email to the registered participants
