VISPEC online

15 October 2021 | 14:30

VISPEC online is an e-meeting opportunity for researchers interested in vibrational spectroscopies and their manifold applications. VISPEC online is an ideal bridge between the latest VISPEC2019 conference held in Brescia and the next VISPEC conference to be held in Perugia. Through this initiative we wish to stimulate scientific discussions on vibrational spectroscopy, encourage collaborations, and welcome those interested to approach such spectroscopic techniques.

15 October 2021 | 14:30

Introduction

High-pressure formation of 1D diamond-like nanowires from aromatics

Roberto Bini

(Dipartimento di Chimica, Università di Firenze | LENS, European Laboratory for Nonlinear Spectroscopy)

Vibrational spectroscopy approach to photosensitive membrane proteins

Michele Ortolani

(Dipartimento di Fisica, Sapienza Università di Roma)

Conclusions

Registration: [Form](#)

The link to follow the Virtual Seminar will be sent by email to the registered participants
