Under the patronage of

VISPEC online

21 April 2022 | 14:30

VISPEC online is an e-meeting opportunity for researchers interested in vibrational spectroscopies and their manifold applications. VISPEC online is an ideal bridge between the latest VISPEC2019 conference held in Brescia and the next VISPEC conference to be held in Perugia. Through this initiative we wish to stimulate scientific discussions on vibrational spectroscopy, encourage collaborations, and welcome those interested to approach such spectroscopic techniques.

21 April 2022 | 14:30

Introduction

Biophotonics-based analysis for clinical application

Marzia Bedoni

(Laboratory of Nanomedicine and Clinical Biophotonics, IRCCS Fondazione Don Gnocchi Milan)

Polarons in organic conjugated materials: interplay between electronic and vibrational properties

Daniele Fazzi

(Dipartimento di Chimica "Giacomo Ciamician" | Università di Bologna)

Conclusions

Registration: [Form](#)

The link to follow the Virtual Seminar will be sent by email to the registered participants
